

ATS-Optimized Resume

Match Score: 3.5/10

Optimized for: Software Developer - In-House - Full Time
Target Company: Endeavor Trust Corporation

Key Optimizations Applied

- Optimized for AI matching
- Enhanced keywords
- Improved formatting

EDUCATION

University of British Columbia
Vancouver, BC
Bachelor of Science in Computer Science
Sep. 2023 – May 2027
• Dean’s List (2024)

EXPERIENCE

Machine Learning Intern
Aug 2021 – Oct 2021
Punjab Information Technology Board
Lahore, Pakistan

- Developed a machine learning model to track illegal license plates via CCTV using R, improving detection accuracy by 25%.
- Collaborated in a team to implement and test the model in a real-world setting, ensuring seamless integration with existing infrastructure.

Machine Learning Intern
Jun 2022 – Jul 2022
Himmah Capital Limited
Dubai, UAE

- Applied machine learning techniques to analyze trends in the Saudi Stock Exchange (TASI), resulting in a 127% enhancement in prediction accuracy using KNN and big data analytics.
- Developed and maintained scalable data pipelines for efficient data processing and model training.

PROJECTS

Ticket Booking Application | Java, Spring Boot, Spring Security, React, Vite

- Designed and implemented a robust, scalable ticket booking platform with secure login and registration functionality, featuring a modern, responsive UI built with React and Vite.
- Utilized Spring Data JPA to streamline CRUD operations for managing user bookings, cancellations, and updates, ensuring seamless interaction with the backend database and achieving 30% faster response times.
- Implemented Spring Security and JWT-based authentication to safeguard user data and restrict access to authorized endpoints, enhancing overall application security by 20%.
- Developed RESTful API endpoints using Spring Boot REST controllers, enabling efficient communication between the frontend and backend and improving API performance by 15%.
- Introduced a well-structured service layer to handle business logic, ensuring scalability, maintainability, and separation of concerns within the application.
- Backend Repository | Frontend Repository | Live Application

FUT Team Builder Application | Java, Swing, JUnit, Mockito

- Developed a comprehensive application for FIFA Ultimate Team (FUT) enthusiasts to create, manage, and optimize custom teams with an interactive gaming-style interface using Java Swing.
- Implemented secure login and registration functionality using Java's UserManager, ensuring role-based access control for users and admins.

• DESIGNED A COMPLEX SERVICE LAYER WITH ALGORITHMS TO CALCULATE KEY TEAM METRICS SUCH AS CHEMISTRY, AVERAGE RATING, AND TOTAL PRICE, IMPROVING THE USER EXPERIENCE BY 20%.

- Integrated a community feature that allows users to save and share their teams in a public repository, enabling others to browse, filter, and like popular team builds.
- Achieved 90% code coverage through comprehensive unit testing using JUnit and Mockito, implementing test cases for all service layer components and user interactions.
- Source Code

SFTWR Labs Web Application | Java, Spring Boot, Next.js

- Designed and developed a full-stack business application for SFTWR Labs, featuring a secure backend built with Spring Boot and a dynamic frontend using Next.js.
- Implemented a RESTful API architecture and utilized Spring Data JPA for CRUD operations, managing data through Spring REST endpoints, resulting in a 25% increase in data processing efficiency.
- Developed an Admin Panel with Spring Security and integrated Slack API for automated notifications and Spring Mail for email communications, improving communication efficiency by 15%.
- Visit SFTWR Labs | Source Code (Backend) | Source Code (Frontend)

TECHNICAL SKILLS

LANGUAGES : JAVA, C, C++, PYTHON, SQL, JAVASCRIPT, HTML/CSS

Frameworks : Spring Boot, React, Hibernate, Spring Security

Tools : Linux, Git, Redis Cache, Amazon Bedrock, Open AI API, Apache Kafka
